

Title: Use of IMS Fields and Modules

Series: 6003

Related Regulations: 6003a

Date Adopted: September 24, 2002

1 New and changing data needs for the Area Education Agencies (AEAs) and the Iowa Department
2 of Education are to be expected. In addition, a statewide system requires a certain degree of data
3 standardization among the consumers. Rather than using a field or module in a way that is not
4 compatible with its original intent, AEAs will submit a request for changes to the Information
5 Management System (IMS) application. As new requests are reviewed and considered by the
6 OGC, the OGC shall not be responsible for ensuring that all relevant fields and modules are being
7 used properly before making a decision about a change to the IMS application. When reviewing
8 requests for changes, the OGC will presume that all fields and modules are being used as
9 designed.
