

Planning

Overview

Different plan types (e.g. reevaluation, review) are tracked via the Plan module. The Plan screen (AEPLF) records information about meeting date, district wide assessment and percent of time not in general education.

Prior to August 2007, the Review module was used to record information about meetings held to discuss plans. The Review file (AEMEF) recorded information about each meeting conducted on a child/youth's behalf. Data are no longer entered into the Review module. The data entered in this module may be viewed via a button on the Plan screen.

This section of the manual addresses both of these modules.

Uniform Data Entry Procedures

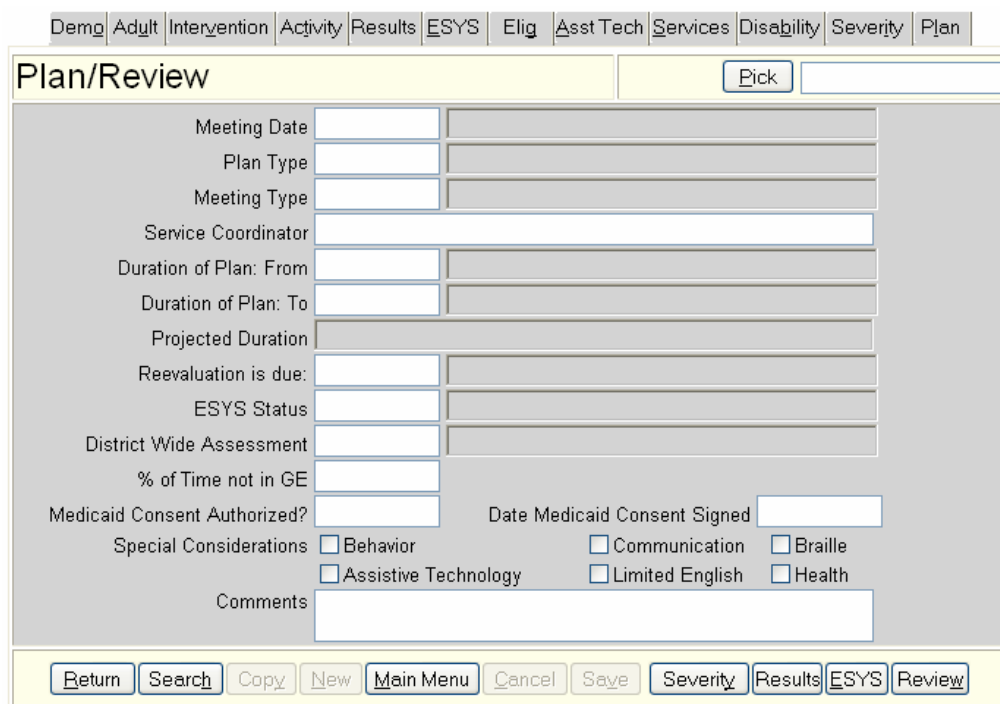

At this time, the following Uniform Data Entry Procedure is related to the Plan screen:

- Plan

If an AEA believes there is a reason to diverge from a Uniform Data Entry Procedure, please contact the DE before initiating any changes.
